Dionis Cebanu

Becoming Web Developper

OBJECTIVE

As a web development student with a passion for technology, I've spent years honing my skills in both frontend and backend development. Starting with the basics—HTML, CSS, and JavaScript—I've gradually expanded my expertise to include PHP and MySQL, diving deeper into the world of databases and server-side programming. Now, I'm ready to take the next step in my journey.

What excites me most is the opportunity to work on innovative projects that push the boundaries of what's possible online. I envision myself contributing to a dynamic team, where every day brings new challenges and opportunities to create impactful digital solutions. With a keen eye for design and a passion for problem-solving, I'm eager to bring my skills to a real-world environment, whether in an internship or an entry-level position.

Technical Skills

- Languages: HTML, CSS, JavaScript, PHP, MySQL, Python (basic), C++ (syntax)
- Content Management: WordPress
- Design Tools: Adobe Creative Suite, Figma
- Version Control: Git, GitHub
- Frameworks/Tools: Bootstrap

Education

2023 feb 2025

Collège de Maisonneuve
Diploma in Web Design and Programming
- Acquiring an advanced, in-depth education in both frontend and backend web development.
- Expertise in core technologies such as HTML, CSS, JavaScript, PHP, and MySQL, along with hands-on experience in complex web projects.
- Developing a strong understanding of web design principles, UX/UI, and database management, enabling the creation of sophisticated and user-focused web solutions.

2020 2023

National College Aurel Vlaicu
High School Diploma – Intensive Mathematics and Informatics
- Began my programming journey at 15 years old, driven by a passion not just to use technology, but to create it.
- Gained foundational experience in programming languages and problem-solving, preparing me for further studies in web development.

Projects

Stampee – Stamp Auction Website
- Currently developing a dynamic platform for auctioning stamps, including user registration, bidding systems, and real-time updates.
Car Deluxe – Car Booking Website
- Developing a comprehensive booking system with features such as email confirmations and PDF generation.
- Integrating role-based access with privileges for admins, administrators, and clients, along with a secure authentication system.
Client Projects
- Actively working on building a website for a photographer, focusing on custom design and functionality to meet specific client requirements.
- Applying skills in HTML, CSS, and JavaScript to deliver a professional and tailored online presence.
